In any given year, one in five people in Canada experiences a mental health problem or illness... Mental Health Commission of Canada

“[Recovery] is a deeply personal, unique process of changing one’s attitudes, values, feelings, goals, skills, and/or roles. It is a way of living a satisfying, hopeful, and contributing life even within the limitations caused by illness. Recovery involves the development of new meaning and purpose in one’s life as one grows beyond the catastrophic effects of mental illness.”
– Anthony 1993

Mental health is not defined by an absence of mental illness but rather by the discovery of hope, purpose, and meaning in daily living. It is possible to enjoy positive mental health and live the life you want while dealing with mental illness and addictions. In fact, you can take steps toward a life of meaning and purpose today. The experience of recovery is rarely an event that happens in a single moment. Most often, it is a journey that takes place over a period of time. Sometimes this journey is brief, other times it may be lifelong; however, it all starts with a single, hopeful step towards better health.

Whether you are just beginning this journey or well on your way to better health, managing change, reaching goals, and maintaining hope requires personal effort as well as support from knowledgeable and trustworthy connections.

The resource and service providers listed in this directory are committed to building healthy communities by partnering with you and your family to:
• Manage symptoms on your terms,
• Find places to live, learn, and work that fit your life,
• Develop supportive relationships and connections in your community,
• Discover, develop, and apply personal strengths,
• Support yourself, a loved one, or others on the same journey.

As you search through the content on the following pages, our hope is that you find the opportunities, resources, and support you and your loved ones need to live well. If you need help with navigating the mental health system, please do not hesitate to contact the Canadian Mental Health Association via phone: 204-982-6100 or online: www.mbwpg.cmha.ca/about-cmha/contact-us/

F I N D I N G  A  D O C T O R
If you or someone you know is experiencing a mental health problem, it is important to seek help early. It is a good idea to see a doctor to assess your overall health and to rule out any underlying physical illness. Be very specific and thorough about what you have been experiencing in order for the doctor to provide the best possible course of treatment.

If you do not have a Family Doctor, you can contact the Family Doctor Finder to help you and your family find a family doctor or nurse practitioner. To register by phone, call 204-786-7111 or toll-free 1-866-690-8280 between 8:30 am and 4:30 pm Monday to Friday. www.gov.mb.ca/health/familydoctorfinder/ Your doctor may prescribe treatment or you may be referred to a psychiatrist or a general practitioner who has specialized training in psychiatry, or other mental health professionals. Other professionals who may be part of your treatment team include: psychiatric nurses, social workers, community mental health workers, occupational therapists or psychologists.

Housing

Having a safe, comfortable and affordable place to live is a very important factor in our emotional well-being. Finding the right type of quality housing that fits your budget can be difficult. Here are some housing resources that may help.

Manitoba Housing owns and manages rental housing accommodations in many locations across Manitoba. Accommodations are available under the Social Housing Rental Program or the Affordable Housing Rental Program. Applicants must meet eligibility requirements and have incomes below the Program Income Limits for each program.

Private Market - This type of housing is not government operated. Rental units are owned and managed for profit by individuals and corporations. They must follow the regulations of the Residential Tenancies Act of Manitoba.

For information about your rights and responsibilities as a tenant or assistance in dealing with your landlord, call the Residential Tenancies Branch (a provincial government agency that assists tenants and landlords). Call 204-945-2470 or 1-800-782-8403.

Non-Profit Housing - Non-profit housing organizations have developed affordable housing for people with low or moderate incomes.

Family members and friends who have a good understanding of the illness, treatment, and resource options will be better equipped to be supportive.

Families can play a valuable role in supporting a family member with a mental health problem. Having a family member with a mental illness is stressful. In addition to coping with the practical issues of day-to-day living, families can experience tremendous guilt, fear, grief, anxiety, self-doubt and uncertainty. The person with the mental illness benefits most from support and encouragement. Family members and friends who have a good understanding of the illness and treatment options will be better equipped to be supportive. Each family member may react differently to the situation. The person dealing with a mental illness must always be treated with dignity and respect.

Many self-help organizations offer information and support to families.

Here are a few tips for Families:

- **TIP** Find out about mental health resources in the community.
- **TIP** Keep a journal of notes about what has been happening, which can help you to see patterns, etc.
- **TIP** Make a list of questions you may want to ask the doctor.
- **TIP** Ask for information about the illness and the treatment.
- **TIP** Offer choices to the person such as “Will you go to the hospital with me or would you prefer (name a friend) go with you?”
- **TIP** Have a plan for dealing with crisis situations such as who to call, what services are available, and who can support the person and family through a crisis.
- **TIP** Make sure you are looking after yourself: maintain outside interests, gain support from others, seek counselling if necessary.

The following offer specialized services for families dealing with mental illness: Family Therapy is also provided by:

- **AROUND FAMILY THERAPY CENTRE** 204-786-9251
- **FAMILY DYNAMICS** 204-947-1401

Income Assistance
Employment and Income Assistance in Winnipeg
Based on the needs assessment, this service provides financial assistance so that single parent families, persons without disabilities, individuals and families who are unemployed, are able to provide for their basic needs. Training and employment supports are provided to assist participants in achieving financial independence through employment.
Family Services and Consumer Affairs has decentralized services for income assistance clients with the exception of adult clients without children.

Services for persons with disabilities, and adult clients with children are provided in Community Office throughout the year. Each of the Community Offices provides a full range of income assistance services at their location, ranging from intake to case management.

The offices are located as follows:
- RIVER EAST / TRANScona
  Access River East: 204-938-5100
  975 Henderson Highway
- ST. JAMES ASSINIBOIA / ASSINIBOINE SOUTH
  204-940-2040 280 Booth Avenue
- RIVER HEIGHTS / FORT GARRY
  204-938-5500
  135 Plaza Drive
- ST. BONIFACE / ST. VITAL
  Access St. Boniface: 204-948-4290
  3-170 Goulet Street
  (English and French Services)
- DOWNTOWN EAST / WEST / MAIN STREET
  Access Downtown: 204-940-8441
  2nd floor, 640 Main Street
  Downtown West: 204-940-8600
  755 Portage Avenue
- POINT DOUGLAS
  204-948-4001 2A – 111 Portage Street
- SEVEN OAKS / INKSTER
  204-938-5600

CMHA Recovery Navigation Specialists work to connect individuals, caregivers, families and natural supports to recovery-oriented supports and services within the entire mental health and addictions systems.

Rehabilitation and Recovery
We provide recovery supports to people 18 and over living with mental illness and addictions in a variety of ways. Through a step-by-step process, our Recovery Workers help people to recover or discover meaningful roles in life. Whether it is a social goal, a housing goal, an educational goal, or an employment goal, participants are supported to develop wellness plans, gain self-awareness and insight about recovery, problem solve an issue before a crisis develops, and respond to and manage stress.

Community Housing with Supports
A Housing First Service that works with people who have experienced chronic or episodic homelessness to find and keep housing of their choosing in the community.

Employment with Supports
A short term program that provides the tools and information for the achievement of satisfying and successful employment.

RECOVERY AND EMPLOYMENT

Canadian Mental Health Association Manitoba and Winnipeg (CMHA)

Everything we do at CMHA is based on the belief that individuals with mental health and addictions issues can recover and create a quality life for themselves.

Our comprehensive range of services includes:
- Mental Health and Addictions Service Navigation
- CMHA Recovery Navigation Specialists work to connect individuals, caregivers, families and natural supports to recovery-oriented supports and services within the entire mental health and addictions systems.
- Rehabilitation and Recovery
- Community Housing with Supports
- Employment with Supports

Participants looking to join or return to the workforce are supported through a rapid employment approach.

What is Psychosis?

Psychosis...

- a common medical condition affecting 3% of the population
- results from a disruption in brain functioning
- can radically alter a person’s thoughts, beliefs, perceptions and behaviour
- affects males and females equally

Treatment is most effective when it starts early. With proper treatment, most people recover fully from the first episode of psychosis. For many, the first episode is also the last. If you suspect psychosis, don’t ignore it!

While moving to a different country may be exciting for some people, others may experience negative thoughts and feelings like confusion, fear, sadness, loneliness and anger.

If you or your loved ones are dealing with a health problem or having difficulties adjusting to your new home, you are not alone, help is available. Our goal is to provide information on the resources you need to face and overcome these challenges. Our hope is that you and those important to you are able to have and enjoy the kind of life you want to live.

Your health is the most important thing that you have. If you or someone you know is experiencing a health problem, it is important to seek help right away. Seeking help early can help to prevent symptoms from getting out of control.

The resources and programs include:
• Finding a doctor (if you do not have one)
• Support for adjusting to new life in Canada
• Medical care and counselling
• Workshops
• Support for disabilities and more

911 Emergency Phone Number
Dial 911 for ambulance, fire department and police emergency services
NOTE: This number is intended for use in emergency situations only.

Address: 5th Floor, 491 Portage Avenue (Rice Building)
Phone: 204-786-9163 • Email: aurora@winnipeg.ca
Website: www.aurorafamilytherapy.com

Family Doctor Finder

If you or someone you know is experiencing a mental health problem, it is important to seek help early. It is a good idea to see a doctor to assess your overall health. A doctor can determine if the cause is a physical illness. Be very specific and thorough about what you have been experiencing in order for the doctor to provide the best possible treatment.

If you do not have a Family Doctor, you can call or register online to be connected with a health care professional near your home (family doctor, pediatrician, or nurse practitioner).

Contact/Address Information:
Phone: 204-786-7111 or toll-free 1-866-690-8260
Website: www.gov.mb.ca/health/familydoctorfinder

Address: William Whyte Residents’ Association – 266 Pritchard Avenue Phone: 204-582-9591
Email: nisw1@wccwc.ca • nisw2@wccwc.ca
How much do you know about mental illness?

Here are some common myths and truths.

MYTH: People with mental illness are violent and dangerous. TRUTH: As a group, mentally ill people are no more violent than any other group. In fact, they are more likely to be the victims of violence than to be violent themselves.

MYTH: People with mental illness are poor and/or less intelligent. TRUTH: Many studies show that most mentally ill people have average or above average intelligence. Mental illness, like physical illness, can affect anyone regardless of intelligence, social class or income level.

MYTH: Mental illness is caused by a personal weakness. TRUTH: A mental illness is not a character flaw. It is an illness, and it has nothing to do with being weak or lacking self-power. Although people with mental illness can play a big part in their own recovery, they did not choose to become ill.

MYTH: Mental illness is a single, rare disorder. TRUTH: Mental illness is not a single disease but a broad classification for many disorders. Anxiety, depression, schizophrenia, personality disorders, eating disorders and organic brain disorders affect millions of Canadians every year.

### Goldberg Depression Scale

The Goldberg Depression Scale is an internationally known scale for screening for depression. This is just a screening tool and is not intended to diagnose depression. If a person rates high on this scale, a professional assessment can accurately diagnose whether or not the person has a clinical depressive disorder.

**Depression Scale**

<table>
<thead>
<tr>
<th>Score one point for each “Yes” if the symptom occurs most of the time over the past 2 – 4 weeks</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Have you had low energy?</td>
</tr>
<tr>
<td>2. Have you had loss of interest?</td>
</tr>
<tr>
<td>3. Have you been sleeping poorly?</td>
</tr>
<tr>
<td>4. Have you been feeling hopeless?</td>
</tr>
<tr>
<td>5. Have you had difficulty concentrating?</td>
</tr>
<tr>
<td>6. Have you lost weight (due to poor appetite)</td>
</tr>
<tr>
<td>7. Have you been waking early?</td>
</tr>
<tr>
<td>8. Have you felt slowed up?</td>
</tr>
<tr>
<td>9. Have you tended to feel worse in the mornings?</td>
</tr>
</tbody>
</table>

People with a score of two (2) have a 50 percent chance of having a mental health problem. With higher scores the probability rises sharply.

### Goldberg Anxiety Scale

The Goldberg Anxiety Scale is an internationally known scale for screening for anxiety. This is just a screening tool and is not intended to diagnose anxiety. If a person rates high on this scale, a professional assessment can accurately diagnose whether or not the person has clinical anxiety.

**Anxiety Scale**

<table>
<thead>
<tr>
<th>Score one point for each “Yes” if the symptom occurs most of the time over the past 2 – 4 weeks</th>
</tr>

### Stress 18 Tips for Dealing with Stress and Tension

Stress and tension are normal reactions to events that threaten us. Such threats can come from accidents, financial troubles and problems on the job or with family. The way we deal with these pressures has a lot to do with our mental, emotional and physical health. The following are suggestions to get you started on managing the stress in your life:

1. **Recognize your symptoms of stress.**
2. **Look at your lifestyle and see what can be changed – in your work situation, your family situation, or your schedule.**
3. **Use relaxation techniques – Yoga, meditation, deep breathing, or massage.**
4. **Exercise – Physical activity is one of the most effective stress remedies around!**
5. **Time management – Do essential tasks and prioritize the others. Consider those who may be affected by your decisions, such as family and friends. Use a list; you will receive satisfaction as you check off completed jobs!**
6. **Watch your diet – Alcohol, caffeine, sugar, fats and tobacco all put a strain on your body’s ability to cope with stress. A diet with a balance of fruits, vegetables, whole grains and foods high in protein but low in fat will help create optimum health. Contact your local Heart and Stroke Foundation for information about healthy eating.**
7. **Get enough rest and sleep.**
8. **Talk with others – Talk with friends, professional counsellors, support groups or relatives about what’s bothering you.**
9. **Help others – Volunteer work can be an effective and satisfying stress reducer.**
10. **Get away for awhile – Read a book, watch a movie, play a game, listen to music or go on vacation. Leave yourself some time that’s just for you.**
11. **Work off your anger – Get physically active, dig in the garden, start a project, or get your spring cleaning done.**
12. **Give in occasionally – Avoid quarrels whenever possible.**
13. **Tackle one thing at a time. Don’t do too much at once.**
14. **Don’t try to be perfect.**
15. **Ease up on criticism of others.**
16. **Don’t be too competitive.**

17. **Make the first move to be friendly.**
18. **H ave SOME FUN! Laugh with people you enjoy.**

### MENTAL HEALTH

**Our mental health is an ever changing aspect of ourselves. Positive mental health is described as:**
- emotional and psychological wellness
- positive self-concept, self-acceptance
- satisfying interpersonal relationships
- satisfaction in living
- feeling in control, taking personal responsibility for your actions and feelings
- ability to handle daily activities

**By being self-aware we can take positive steps towards mental health when the balance is disturbed. Here are some simple ways to work toward regaining a balance:**
- get adequate sleep
- eat a balanced diet
- get regular exercise
- practice relaxation techniques
- make time for pleasurable activities, hobbies, and work
- prioritize tasks, delegate, don’t take on too much
- develop supportive relationships
- don’t be overly critical of yourself
- focus on your strengths and abilities
- LAUGH!

### Mindfulness Based Stress Reduction

Courses are offered through OMHA MANITOBA AND WINNIPEG office. Call 204-982-6100 or visit mbwpg.omha.ca for more information.

#### Walking Breaks

Walk away from stress instead of sitting down for another cup of stress-inducing caffeine on your coffee break; lunch hour or when you’re at home by going for a stress relieving and energizing walk. If you don’t like walking by yourself, try forming a walking club with two or three of your co-workers or friends.
A police officer may be requested through a warrant or their emergency powers to balance an individual’s need and right to treatment, the individual’s civil rights not to be arbitrarily detained, and the need of society to prevent people from harming themselves or others when they are mentally ill.

Here are the key points for consumers to know:

1. How are people admitted to a psychiatric facility?

   VOLUNTARY PATIENT

   A person may request admission as a voluntary patient, in which case, a doctor must agree that admission is indicated. The vast majority of patients who are admitted to a psychiatric unit in a hospital are admitted voluntarily.

   INVOLUNTARY PATIENT

   Any doctor can make application for a psychiatric assessment based on his or her personal assessment that the individual is suffering from a mental disorder that likely will result in a serious harm to themselves or another person, or will seriously deteriorate if not kept in a psychiatric facility.

   • A police officer may be requested through a warrant or their emergency powers to bring a person to a psychiatric facility for assessment.

   • A police officer who takes a person into custody for an involuntary medical examination must inform the person in writing:
     - where the person is being taken
     - the reason why they are being taken for an involuntary medical examination
     - that they have a right to call a lawyer.

   DISCHARGE

   A person can be kept involuntarily in a psychiatric facility for up to 21 days. If not ready for discharge, the certificate can be renewed for up to 3 months. However, the psychiatrist can also change the person’s status from involuntary to voluntary at any time if they no longer meet the conditions to be an involuntary patient. The patient must be informed of any change in status.

   2. Can a person be forced to accept medication against their will?

   If a person is considered to be mentally competent to decide on psychiatric treatment, they have the right to refuse or accept medication or treatment. An individual is considered competent to decide on psychiatric treatment if the person has the ability to understand the nature of the illness for which treatment is proposed, the treatment recommended, and is able to appreciate the consequences of giving or withholding consent.

   If a person is not mentally competent, the psychiatrist must get consent from a family member, committee, proxy or the public trustee before giving medication.

   3. How can a person appeal decisions about their involuntary status or treatment in a psychiatric facility?

   Review Board applications are available at the nursing station in each psychiatric facility. A review board is an independent committee of 3 people who:

   • May review involuntary status, mental competency, failure to comply with a health directive, competency to manage property, extension or cancellation of a leave certificate.

   • May authorize treatment for a patient who is not mentally competent.

   • May authorize the withholding of access of a patient to his or her clinical file.

   A Review Board hearing will take place within 21 days of the date the application. A person is entitled to be represented at the hearing by a lawyer, advocate or person of their choice. A decision will be made within 2 - 3 days following the hearing.

   4. Can an involuntary patient be discharged from a psychiatric facility?

   A Certificate of Leave is a written agreement between a patient and a doctor that may be issued for a period of six months allowing an involuntary patient (who meets certain criteria) to live outside the psychiatric facility.

   The certificate contains conditions specifying that the patient must report at specific times and places for treatment. Once the certificate is issued, that patient becomes voluntary. If the patient does not report for treatment as agreed, the doctor can request the police to return the patient to the psychiatric facility.

   5. Does a person have a right to see their hospital file?

   YES. A person can apply in writing to the medical officer in charge of the psychiatric facility to see and/or copy the clinical record. The person needs to give their name, address, date of birth and date(s) of hospitalization. The hospital can charge a fee for administration and copying. It is important to inform Medical Records if a person cannot afford the fee. Most facilities will adjust the fee or waive it.

   Within 7 days of receiving a written request, the medical officer may either grant the request to see the file (which is usual), or may apply to the Review Board for permission to withhold all or part of the clinical file. If there is incorrect information in the file, a correction can be requested, or a statement of disagreement can be added to the record.

   The Review Board can order the medical officer to give access to the clinical file unless the board believes that this would likely cause:

   a) serious harm to a person’s treatment or recovery
   b) serious physical or emotional harm to someone else.

   6. If you need specific information regarding the Mental Health Act and your rights call:

   CANADIAN MENTAL HEALTH ASSOCIATION MANITOBA AND WINNIPEG  204-982-6100 930 Portage Avenue

   MENTAL HEALTH REVIEW BOARD  204-945-6050 10-105 Portage Avenue

   A WOMAN’S PLACE – DOMESTIC VIOLENCE SUPPORT AND LEGAL SERVICES Provides support, advocacy, and free legal consultations as well as representation to women exiting abusive relationships.

   204-940-1966  200 – 323 Portage Avenue
Counselling or Therapy

Finding A Clinical Psychologist

Clinical Psychology

Clinical psychologists are able to diagnose mental health disorders/conditions, conduct comprehensive mental health assessments, and provide a variety of empirically supported treatments. The Manitoba Psychological Society’s website (www.mps.ca) provides information on accessing both private practice and publicly funded psychologists.

The Psychological Service Centre, a service offered through the University of Manitoba, has a mandate to train graduate students in the discipline of clinical psychology and serve as a community resource to those in need. Referrals are accepted for therapy and assessment from the general public during regular academic session (September to April annually). Services are provided at no charge, however space is limited; therefore, service cannot be guaranteed to all those on the waiting list. It is also important to note that most services are unavailable during the summer months. 161 Dafoe Building, University of Manitoba, 204-474-9222. Fax: 204-474-6297. http://umanitoba.ca/faculties/arts/departments/psych/services/

School Based Mental Health Services

Unless you have had direct contact with school based clinical services, you may not be aware that services are available in most Winnipeg schools and in many schools throughout the province. School Psychologists are mental health specialists who partner with parents, schools, and others in the community. School Psychologists provide a continuum of services that include education, advocacy, assessment and various treatment approaches. Focusing on such areas as resilience, competence, and self-esteem, School Psychologists can help students develop positive mental health practices that can last a life time. Accessible through the school system, this confidential and free service is often the entry point for mental health services for children and youth. If you have any questions or concerns regarding your child’s functioning and/or mental health, help may be found in your local school through your School Psychologist.

In addition to medical treatment, professional counselling or therapy is often beneficial in the treatment of mental health problems or mental illnesses. Counselling may address one or more of the following issues:

- effective coping strategies for daily living
- relationships and family communication
- changing negative thought patterns
- dealing with loss and grief
- childhood issues of abuse, neglect or trauma
- crisis planning
- managing emotions in a healthy way
- problem-solving
- building self-awareness and self-esteem
- developing new skills
- Counselling can come from a number of perspectives and may be focused on particular issues. Examples of different perspectives may include feminist or faith-based approaches. Sometimes counselling is focused on a particular issue such as domestic abuse, past childhood abuse, or specifically for men. When choosing a counsellor or counselling organization, ask questions about their perspective and focus to make sure it fits with your values, beliefs, and needs.

Finding a Counsellor

- Ask your doctor for a referral to a qualified counsellor (a referral may be required by the counsellor or by your insurance plan to receive coverage). See the Yellow Pages under Counsellors.
- Your employer may have an Employee Assistance Program (EAP) that provides free confidential counselling or referral to counselling.
- Check if your private medical insurance plan covers professional counselling.

Contact any one of the agencies listed below.

Alternative or Complementary Therapies

If you consider alternative or complementary therapies, it is important to discuss these with your doctor so they can assess if the therapy will interfere with your medical treatment. It may be helpful to ask the following questions when exploring alternative therapies:

- How does the treatment work?
- What is the cost of treatment?
- How frequent are treatments required?
- What training do practitioners receive and are they registered or licensed?
- What results may be expected?

SOME ORGANIZATIONS YOU CAN CONTACT FOR MORE INFORMATION OR REFERRAL:

Massage Therapy Association of Manitoba ☑ 204-927-7979 · www.mtam.mb.ca

Reflexology Association of Canada ☑ www.reflexologycanada.org
SOCIAL ACTIVITIES

Being part of interesting activities and having friends are important. They give us something to care about and add meaning to our lives. The following are some helpful hints in locating activities and finding out the information you need to decide if an activity or club is for you.

Gathering Information

Local community newspapers (e.g., The Metro, The Times) as well as the “Winnipeg Neighbours” (published by the Winnipeg Free Press every Wednesday), are good sources of information about activities and interest groups or hobby clubs throughout Winnipeg. Interest or hobby clubs are very open to new members and all that is required is an interest in the club and its activities. Other good sources of information about types of clubs or other activities include:

- Winnipeg Public Library – visit winnipe.ca/library for online and in-person ways to connect, socialize, and learn
- The internet – search keywords pertaining to your topic of interest, “clubs” or “associations”
- Public bulletin boards at libraries or in the community
- Shopping malls or grocery stores and community organizations
- Friends, relatives and acquaintances are usually more than willing to tell us about their experience and knowledge of social activities.

Getting Involved

After locating an activity or club you find interesting, there may still be certain information you want or need before making a decision. Often a phone number and/or contact person is listed. Possible questions you may want to ask are:

- Are there any costs involved in participating in the activity or group? Is membership required?
- When and where is the activity/event? Is it accessible by bus? What happens at the activity?
- Who attends the activity or club? (e.g., men and women or a mix of both, age range of people who attend, how many people attend or are members)
- Are there any specific skills needed to attend or become a member?
- How are new people welcomed?

Sharing the Fun

Going to new places or meeting new people is not always easy and can be stressful. It may help to go with a friend or let the contact person know you are coming. They will often make a point of looking for you and perhaps introduce you to others. It takes time to meet others and feel comfortable in a new setting. Give yourself and the activity a chance. You may be pleasantly surprised.

Recreation

The City of Winnipeg Community Services Department provides a variety of recreation, leisure and sports programming throughout Winnipeg. People with a disability or special needs are encouraged to participate in regular programs. For these programs the Department may be able to offer support, such as a leisure assistant or consider a fee waiver if financial limitations prevent participation. For information, call 311.

Information on programs can be found at www.winnipe.ca/leisureonline or a Leisure Guide can be picked up at various locations throughout the city.

CITY OF WINNIPEG ADAPTED SERVICES

Individuals of all ages with a special need are invited and encouraged to participate in all community programs offered within the Leisure Guide. Every effort will be made to modify programs to suit individual needs and ensure a positive recreation experience. For more program information call 311.

YMCA-YWCA OF WINNIPEG

301 Vaughan Street – 204-947-3044

A reduced membership may be available by going in person to the downtown branch and asking for a membership assistance appointment.

WELLNESS INSTITUTE AT THE SEVEN OAKS GENERAL HOSPITAL –

1075 Leila Avenue – 204-632-3900

www.wellnessinstitute.ca

Offers a variety of health and wellness programs.

CMHA WELLNESS WALKS

Studies have shown that regular walks in nature can relieve anxiety, depression, and improve overall health. Join CMHA Manitoba and Winnipeg Recovery Support’s during the warm months for a relaxing nature walk and afternoon of socializing. For more information, please call 204-982-6100.

Skill Building

YMCA-YWCA Learning and Leisure Centre

This community based program is for adults who have experienced mental illness and require support to attain/maintain recovery and live satisfying lives. Services include a variety of skill building courses and workshops; social activity groups; a family education group; and the opportunity to use the YMCA-YWCA of Winnipeg health and fitness facilities. Intake is done continually throughout the year. Self-referrals are accepted as well as referrals from professionals, individuals with co-occurring substance use or gambling disorders are welcome. Call 204-989-4194 for more information.

Community Therapy Services Inc.

SUPPORT AND CONSULTATION FOR INDEPENDENT LIVING

Occupational Therapists in this program work with adults recovering from serious mental illness who lack experience or have difficulty with independent living skills such as money management, meal preparation, household and community management, etc. Therapists complete functional assessments and assist individuals to gain independence through developing skills and/or accessing supports for improved success in community living. CTS therapists can also assist individuals with physical limitations to become more independent through identifying appropriate equipment, home adaptations, and other interventions. Call 204-949-0533 for more information or to access.

Get Better Together

A program for living better with chronic disease. Get Better Together is a free 6 week program to take control of your health and be better able to: manage pain, start an exercise program, eat well to live well, use medications effectively, deal with fatigue and frustration, increase your energy level, solve problems and meet personal goals, and talk to your doctor and make choices. Call 204-632-3927 to register. Visit www.wellnessinstitute.ca for more information.

MH Resources for Winnipeg
Medication

Medication can be an effective part of a treatment plan for people with mental illnesses. It can control the acute (immediate) symptoms and prevent relapse of both schizophrenia and mood disorders. However, medication does not cure mental illness – only controls it. Medication has factors to consider such as side effects, time necessary to be effective and cost. For these reasons it may be necessary to try several different medications to find the drug or combination of drugs that is right for you. The dose may also need to be adjusted to make sure the drug is working most effectively.

The following information is meant as a general guide only. There are a wide variety of medications available for the treatment of mental health disorders. It is important to talk to your doctor, pharmacist, and other health care providers about all your medications – including the ones that you may be taking for other conditions. Try to go to the same pharmacist for all your prescriptions. If you experience side effects from any medication, or if you have a medication allergy, talk to both your doctor and pharmacist about it. Talk to your doctor before changing your dose or stopping your medication. Stopping medication suddenly may cause withdrawal effects which often resembles flu-like symptoms.

In Manitoba, your pharmacist is required to discuss with you, in an atmosphere of confidentiality and privacy, the following information about your prescription medication:

- The drug name
- What the drug does
- How and at what time the drug should be taken
- Importance of taking the drug as directed, regularly or when needed
- What to do if the dose is missed
- Common side effects
- Food, drink, other drugs or activities to avoid
- Special storage requirements

Remember that the use of alcohol with any medication is potentially dangerous. Smoking can also affect how the body metabolizes medications. If you smoke, let your doctor know if you plan on quitting.

The following are descriptions of general sub-categories of medications commonly used – many of these medications are used across a range of mental health disorders.

### Antipsychosis Medications

Also known as neuroleptics, major tranquilizers, 1st generation antipsychotics (e.g. Halolol), 2nd generation antipsychotics (e.g. olanzapine). These medications are used to treat acute psychotic episodes as well as reduce relapse of conditions such as schizophrenia and bipolar disorder. These medications are either taken by mouth or given as an intramuscular injection. These medications work best if taken around the same time every day.

**SIDE EFFECTS** include drowsiness, dizziness, dry mouth, movement problems and stiff muscles. tardive dyskinesia (TD) or involuntary movements may occur when they are used for longer periods of time. Managing side effects may be achieved by changing doses, changing medications, or taking medications for movement side effects, for example: benzotropine, procyclidine, and trihexyphenidyl.

### Antidepressants

Antidepressants are used to treat and control depression. There are many different types of medications that are used as antidepressants. Each group has an effect on different chemicals (neurotransmitters) in the brain that affect mood. Some examples are:

- MAOIs (Monoamine Oxidase Inhibitors)
- SSRI’s (Selective Serotonin Reuptake Inhibitors)
- SNRI’s (Serotonin-Norepinephrine Reuptake Inhibitors)
- Dual-Action Antidepressants (affect 2 different neurotransmitters)
- Tricyclic Antidepressants

**SIDE EFFECTS** include dry mouth, blurred vision, difficulty urinating, constipation, dry nose, and dizziness. These medications take several weeks to reach their full effect. Antidepressants work in the nervous system, some antidepressants are also used in other conditions such as pain.

### Mood Stabilizers

These are used to treat people in the state of great excitement and emotional stress, for example acute mania. Lithium is the most common. Carbamazepine, valproic acid, topiramate, are also used as mood stabilizers because their action is in the nervous system. In some people, these drugs can have fewer side effects. These can take several weeks to work. Regular blood tests are needed for therapeutic effect. It is also important to drink adequate water, especially when taking Lithium.

**SIDE EFFECTS** include lethargy, trembling, nausea, diarrhea, frequent urination, and mental functioning problems.

### Antianxiety Medications

Also known as tranquilizers or sedatives, antianxiety medications are used to relieve the distress of anxiety. Benzodiazepines are most commonly prescribed.

**SIDE EFFECTS** include sedation, lethargy, depression, difficulty concentrating, and memory problems. Dependency can occur if they are used for long periods of time.

### Herbal or Natural Remedies

There are many herbal products that are promoted as natural alternatives to medication. There are also vitamins and supplements that may be taken as supportive nutrients and may help improve symptoms of mental illness.

If you are considering an herbal or natural remedy, tell your doctor and pharmacist that you are considering using the remedy. They will provide information, advise you whether it will be suitable for you or if it will interfere with other medication you are using.

Some commonly used herbal products are:

- SAMe (S-adenosyl-L-methionine)
- St. John’s-wort (Hypericum perforatum)

Some commonly used vitamins and supplements are:

- Vitamin D (1000 – 2000IU per day)
- Omega-3 (EPA)
- Vitamin B complex

**Talk to your pharmacist for more information about your medications. They are there to help you!**
What do you think of when you hear that someone is suffering from a mental illness? Some people feel fear, concern, or confusion. Some even avoid those who experience mental illnesses. But mental illnesses are just like any other illness: everyone deserves care, help, and support.

WHAT ARE MENTAL ILLNESSES?
Mental illnesses are health problems that affect the way we think about ourselves, relate to others, and interact with the world around us. They affect our thoughts, feelings, and behaviors. Mental illnesses can disrupt a person’s life or create challenges, but with the right supports, a person can get back on a path to recovery and wellness.

It’s important to understand that there are many different types of mental illness that affect people in different ways. Within each mental illness, people may have very different symptoms and challenges. However, symptoms are just one piece. Access to services and support from loved ones, and the ability to talk with others in communities play a big part in the way people experience mental illnesses. Culture, background, and personal beliefs also shape the way people understand and think about wellness.

DIFFERENT MENTAL ILLNESSES
Health professionals divide mental illnesses into several different groups based on signs or symptoms. Common groups of mental illnesses include:

- Anxiety Disorders
- Mood Disorders
- Eating Disorders
- Organic Brain Disorders
- Personilaty Disorders
- Psychotic Disorders

These disorders affect a person’s mood—the way they feel. This can affect every part of a person’s life. When someone experiences a mood disorder, they may feel sad, hopeless, tired, scared, or afraid. At times, some people experience an unusually ‘high’ mood and feel powerful and energetic, but this can also create problems. Depression and bipolar disorder are examples of mood disorders.

Eating Disorders
Eating disorders usually aren’t about food. They are complicated illnesses that are often a way to cope with difficult problems or regain a sense of control. Eating disorders may include seriously restricting how much food a person eats, bingeing, or purging food. Anxieties nervous and bulimia nervosa are examples of eating disorders.

Psychoitic Disorders
Psychosis is a health problem that affects how people understand what is real and what isn’t real. People may sense things that aren’t real or strongly believe things that can’t be real. Schizophrenia is one example of a psychotic disorder.

Personality Disorders
Personality disorders are patterns of thoughts, feelings, and behaviours that may last for a long time and create challenges in a person’s life. People who experience personality disorders may have difficulties developing healthy and satisfying relationships with others, managing their emotions well, avoiding harmful behaviour, and working toward important life goals. Personality disorders can affect the way people understand and view themselves and others and cope with problems. Borderline personality disorder is an example of a personality disorder.

Chilhood Disorders
This is a large group of mental illnesses that start to affect people when they are young, though some people aren’t diagnosed until they’re older. One example of a disorder in this group is attention-deficit/hyperactivity disorder (or ADHD), which affects a person’s ability to focus, complete tasks, plan or organize, or think through actions.

Dementia
‘Dementia’ refers to a group of symptoms. It can be caused by a disease that mainly affects nerve cells in the brain or can be associated with many other medical conditions. Dementia impacts a person’s memory, language abilities, concentration, organization skills, mood, and behaviours. Alzheimer’s disease is one type of dementia.

A NOTE ON SUICIDE
Suicide occurs when someone ends their life on purpose, is not a mental illness in itself. Not everyone who dies by suicide experiences a mental illness. However, suicide may be linked to many different mental illnesses. It’s important to take any talk or thoughts of suicide seriously and seek help.

Organic Brain Disorders
• affects about 1% of people as a result of physical disease or brain injury.

- includes Alzheimer’s disease, AIDS dementia complex (caused by damage to brain cells by the HIV virus), and damage from strokes and accidents.

These organizations offer information and support for Organic Brain Disorders:
